BoRui (Scott) Li

Web Developer | React & TypeScript

Burnaby, BC, Canada | Available up to 20 hours/week

github.com/lizuoqiu | linkedin.com/in/borui-li

PROFILE

I build responsive websites, landing pages, and interactive prototypes. I can help with Figma-to-web implementation, interface improvements, and REST API integration. SFU Computing Science PhD student with four years of React experience.

CORE SKILLS

Development: React, TypeScript, JavaScript, HTML/CSS, Node.js; Python, Java, SQL.
Design & delivery: Figma, REST APIs, interactive prototyping, unit and system testing.

SELECTED PROJECTS

BZC Bio | Bilingual corporate website — September 2026

Independent website design, development and deployment | bzcbio.co.zw

- Designed, developed, and deployed the bilingual corporate website in two weeks.
- Added email-based product enquiries and a location map.

BeadCAD | Interactive 3D design prototype — April - October 2026

Ongoing research prototype | React, TypeScript, Node.js

- Developed a browser-based fuse-bead design prototype with textured model import, part selection and isolation, cutting controls, and edit previews.
- Implemented GLB save/reopen workflows; ongoing work covers bead conversion and part connections.

LiDArgus | Configurable LiDAR sensing — ACM UIST 2025

First author; team research prototype | Published paper

- Co-developed a prototype combining LiDAR, voice interaction, computer vision, and live point-cloud feedback for diverse privacy preferences.
- The system supports sensing-zone creation/removal, resolution adjustment, sensing disablement, and dynamic zone following.

Earlier work: Angular maps, Java/Spring websites, Cradle backend/testing, and interactive 2D shading.

EXPERIENCE

Artificial Intelligence Developer Intern — May - September 2023

China Three Gorges High Technology Corp | Full-time internship | Yichang, China

- Prepared annotated datasets and trained computer-vision models for safety and monitoring tasks. Contributed to monitoring assistants and a multimodal AI office-assistant project.

EDUCATION

Simon Fraser University — September 2024 - present

PhD student, Computing Science | Expected graduation 2029.

Simon Fraser University — 2021 - April 2024

BSc, Computing Science | Graduated with Distinction.
